

JOSHUA FRIDAY

Full-Stack Engineer • Lead Software Engineer, UniMarket

Nigeria (Remote-Friendly) | fridayjoshua275@gmail.com | linkedin.com/in/joshua-friday-chizam | github.com/jay-fri

PROFESSIONAL SUMMARY

Full-stack engineer who builds production web apps end to end, frontend to database, and uses AI tooling (Claude Code, LLM APIs) as a core part of how I ship. Lead engineer on UniMarket, a live multi-university marketplace, with contract and internship experience across healthtech, retail POS, and enterprise workflow tools. Computer Science student at Igbinedion University, Okada, expected to graduate July 2027.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, Framer Motion, PWAs

Backend: Node.js, Supabase, PostgreSQL, REST APIs, Auth, Serverless Functions

Mobile: React Native, Capacitor

AI Tooling: Claude Code (primary daily tool), LLM APIs for production features, prompt engineering

Tools: Git/GitHub, Vercel, Docker (basic), CI/CD

EXPERIENCE

Lead Software Engineer | UniMarket | May 2024 - Present

- Lead engineering on UniMarket, a multi-university marketplace live across Nigerian campuses.
- Own the React/Next.js frontend, Node/Supabase backend, escrow payment flow, and the AI systems behind search ranking and content moderation.
- Named national finalist in the 2025 National Enterprise Challenge for UniMarket's escrow-protected marketplace model.

Software Engineer Intern | Flux Creative Technologies | Jul 2026 - Present

- Joined as a software engineering intern on a remote engineering team.

Software Engineer (Contract) | Sweet Spot | Jan 2026 - Apr 2026

- Built the React/TypeScript interface for a point-of-sale application (Samba POS System), with AI-driven sales analytics and inventory tracking.

Software Engineer (Part-time) | Soapnote | Mar 2025 - Jan 2026

- Built and refined UI features for a U.S.-based clinical documentation platform, owning front-end implementation while contributing across the stack.

SELECTED PROJECTS

UniMarket - Multi-university marketplace; escrow payments, verified sellers, AI-assisted moderation and search ranking. React, Next.js, Node.js, Supabase, PostgreSQL.

Samba POS System - Hybrid mobile POS with offline-aware logic and AI sales analytics.

Bahamas Wellness - Healthcare site with appointment booking and memberships.

Campus Connect NG 2.0 - AI-powered study-group matching and campus payments (in development).

CERTIFICATIONS

AI Fluency: Framework & Foundations - Anthropic

Claude 101 - Anthropic

ACHIEVEMENTS

National Finalist, National Enterprise Challenge 2025 - South-South Regional Top 3.

3rd Place, Inter-University Hackathon - Wellspring University.

1st Place (three-time winner), Igbinedion University internal hackathons.

EDUCATION

B.Sc. Computer Science - Igbinedion University, Okada (Expected July 2027)
